Mansehra, Pakistan | +92 315 5856179 | saifboss313@gmail.com | linkedin | github | Portfolio

Professional Summary

Full-stack Software Engineer graduate with hands-on experience building production-deployed web and mobile applications including a national health platform affiliated with Harvard Medical School. Runner-up at Trillet.ai Hackathon. Experienced in MERN, Django, REST APIs, and cloud deployment; passionate about building software that creates real-world impact.

Education

FAST - National University of Computer and Emerging Sciences

Bachelor of Science in Software Engineering, CGPA: 3.11

Islamabad, Pakistan

Aug. 2022 – Jun. 2026

Experience

Software Engineer Intern

Jul. 2025 – Sep. 2025

FAST-NUCES

- Delivered the MVP of Zehni Sehat, a national mental health platform, serving users across Pakistan by architecting and deploying a full-stack MERN application with REST APIs, cloud-hosted backend services, and a production-grade deployment pipeline on Azure.
- Improved user engagement and cross-platform reach, as measured by support for both web and mobile sessions, by building a Flutter mobile application that synced in real-time with the platform's Node.js backend via REST APIs.
- Accelerated AI model accuracy for a conversational wellbeing avatar by curating and structuring psychology research datasets, enabling more personalized and clinically grounded responses.
- Contributed to a product affiliated with Harvard Medical School and McLean Hospital (USA), working under academic supervision on software that supports real-world mental health decision-making.

Technical & Development Director

Aug. 2025 – May. 2026

MLSA Society

FAST-NUCES

- Increased technical skill adoption across the student body, as measured by workshop attendance and participation, by designing and delivering hands-on sessions on modern software development tools, version control, and cloud-based workflows.
- Strengthened industry exposure for 50+ students by coordinating industrial tours and technical events, directly connecting peers with professional engineering environments.

Software Engineer

Nov. 2023 – Dec. 2023

KPK Culture & Tourism Authority

Peshawar

- Collaborated on the creation of the Software Requirement Specification (SRS) document for KPK Culture & Tourism Authority.

Projects

ClassSphere VR | *Flutter, Blender, Unity, Node.js, MongoDB,*

Aug. 2025 – May 2026

- Architected a cross-platform VR classroom system spanning mobile (Flutter), backend (Node.js + MongoDB), and immersive VR (Unity/XR) designed and delivered end-to-end as Final Year Project over 9 months.
- Built a unified REST API backend handling real-time authentication, session management, and cross-platform state synchronization between mobile and VR clients simultaneously.
- Designed the system architecture to be AI-extensible with hooks for NLP-driven virtual lectures and Text-to-Speech, enabling future automation of instructor-led content delivery.

Sports Manufacturing ERP | *Django, React, MySQL, REST APIs*

Jan. 2026 – Feb. 2026

- Built a full-stack ERP system for sports manufacturing operations, managing end-to-end workflows across 6 departments and reducing manual processing through automation of order routing, stock monitoring, production tracking, and payroll/tax calculations.
- Developed role-based dashboards for 6 user types using React frontend and Django REST Framework backend with MySQL database, enabling real-time inter-department communication and data synchronization.

- Deployed the application on Railway for production hosting with continuous deployment support.

Tela - Freelancer Client Portal SaaS | *React.js, Node.js, Express.js, MongoDB, Stripe, AWS* 2026

- Built a full stack multi-role SaaS platform centralizing client management, milestone tracking, file sharing, invoicing, and payments into a single branded workspace eliminating scattered communication and manual follow-ups.
- Developed React.js and Tailwind CSS frontend with separate client and freelancer dashboards, powered by a Node.js, Express.js REST API with JWT authentication and MongoDB backend.
- Integrated Stripe payment gateway with webhook handling, Cloudinary for file delivery, and SendGrid for automated transactional emails including client invites, milestone updates, and invoice reminders.
- Deployed the application on AWS EC2 for production-ready hosting with scalable infrastructure.

HealthMate - AI Medical Agent | *AI, API integrations*

Trillet.ai Hackathon

- Built an AI-powered agent that triages minor illnesses, books doctor appointments, and dispatches ambulances — awarded Runner-up at Trillet.ai Hackathon out of competing teams.

Technical Skills

Core Stack: React, Node.js, Express, MongoDB, REST APIs, Django, Flask, PHP

Languages: Python, JavaScript, TypeScript, Dart, C/C++, C#, HTML/CSS

Cloud & Deployment: Vercel, Railway, AWS, Azure, Git/GitHub

AI & Data: n8n (Automation), Hugging Face APIs, Pandas, NumPy, Jupyter, Google Colab

Mobile & UI: Flutter, Next.js, Tailwind CSS, ShadCN, Bootstrap 5

Databases: PostgreSQL, MongoDB, MySQL, SQLite

Soft Skills: Leadership, Communication, Teamwork, Time Management, Quick Learning

Achievements & Certifications

Runner-up – Trillet.ai Hackathon: Built *HealthMate*, an AI-powered agent that suggests medication for minor illnesses, books doctor appointments, and arranges ambulances for emergencies.

Certifications: HTML and CSS in Depth (Meta, Coursera) • React Basics (Meta, Coursera)
